# 1.

I used this setup in simulink for Q1 and I arranged a scope for each output desired.

this is the output for  $r(t)$

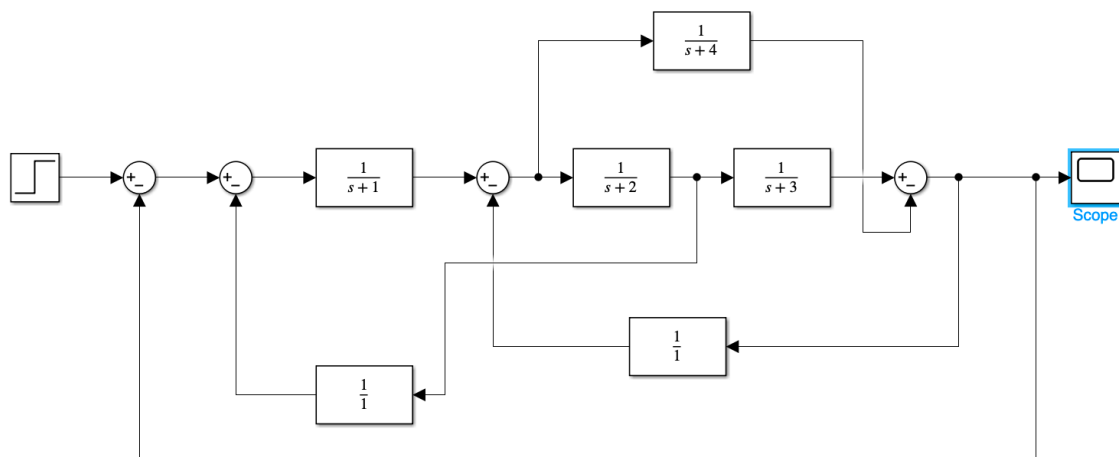

This is the output for  $u(t)$

This is the output for  $y(t)$

## 2.

So this is the Q4 block diagram in simulink. Everything is clear and I located a scope at the end to see the desired result.

Here I gave step function as input and here is the output for it :
